

# MProbe® UVVISNIR

## Thin Film Measurement System

*It is easy to be an expert with MProbe*

MProbe UVVisNIR is flexible modular system with separate UVVis and NIR modules that can be used independently or together. Optional transmittance accessory can be used for transmittance measurement

**Thickness Range: 1 nm - 150 μm**  
**Wavelength Range: 200nm -1700nm**  
**Spot size: 0.5 mm**

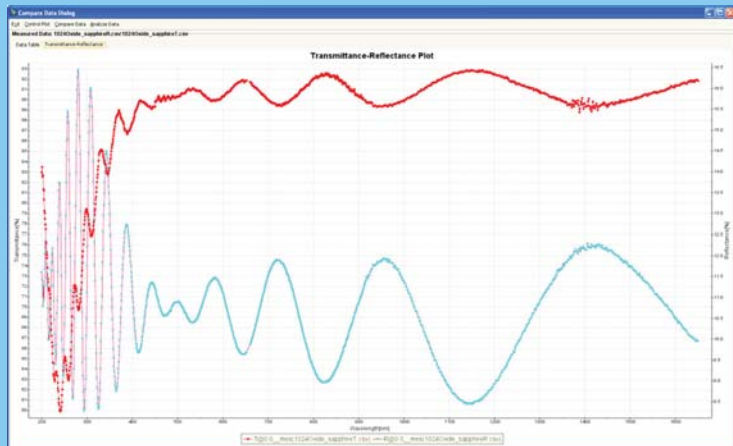

Majority of translucent or lightly absorbing films can be measured quickly and reliably: Oxides, Nitrides, Photoresists, Polymers, Semiconductors (Si, aSi, polySi), Compound Semiconductors (AlGaAs, InGaAs, CdTe, CIGS), Hard coatings (SiC, DLC), Polymer coatings (Paralene, PMMA, Polyamides), adhesives, thin metal films and many more.

**Extensive materials library** (500+ materials) - new materials easily added. Support of parameterized materials: Cauchy, Tauc-Lorentz, Cody-Lorentz, EMA and many more....

**Flexible:** Easy integration with external softwares.

Measurement parameters: thickness, optical constants, surface roughness. Unlimited number of layers. Reflectance and transmittance (optional) spectra

**User friendly and powerful:** One-click measurement and analysis. Powerful tools: simulation & sensitivity, background and scaling correction, linked layers and materials, multisample measurements, dynamic measurement and production batch processing.

Reflectance and transmittance measurement 1 μm oxide on sapphire slide (200-1700nm wavelength range)

Precision	<0.1nm or 0.1%
Accuracy	<0.2% or 1 nm
Stability	<0.2nm or 0.3%
Spot Size	0.5 mm
Sample Size	from 5 mm to 200mm x 200 mm

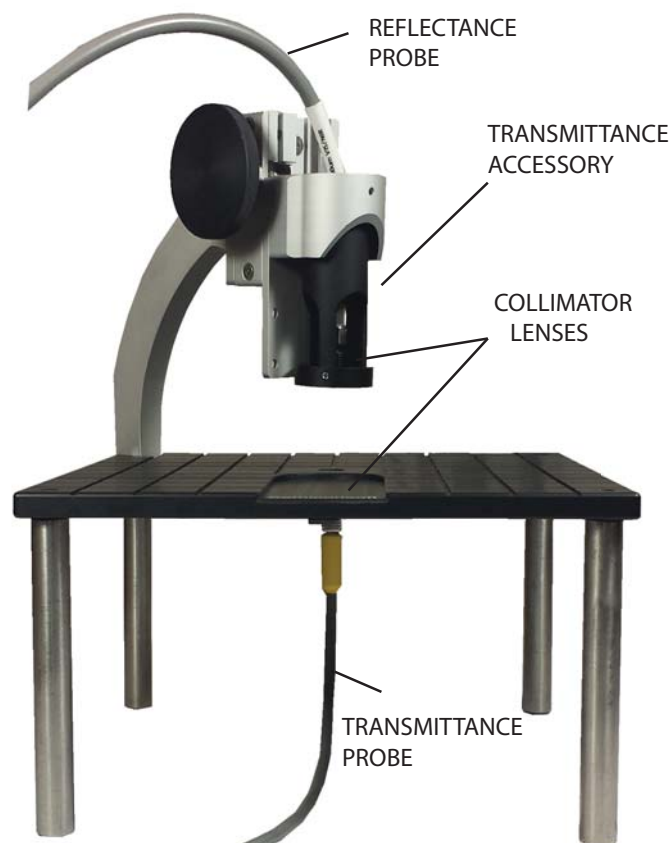

Clean room class 1000 design

## Basic Options/ Specification

Option	Description	Comments
<b>-MXY[6", 8" or 12"]</b>	Motorized XY stage 6" x6" (150mm), 8"x8" (200mm) or 12x12" (300mm). Solid aluminum platform. Stepper motors copntroller and software support for mapping is included. 0.5 $\mu\text{m}$ step size, $\pm 1 \mu\text{m}$ repeatability	see Mapping brochure for details
<b>-TO</b>	Transmittance measurement configuration. Includes: transmittance accessory for SH200A stage, UV/NIR mixed bi-furcated fiberoptics cable, quartz collimators	
<b>-PC</b>	15" Dell laptop with minimum specification: dual-core CPU (Intel i5), 2GB RAM, 500GB HD, W@ indows 7/10 64 bits. All software installed and configured with the system	

### Included in the Box:

1. MProbe UVVis and NIR main units
2. UV/NIR mixed reflectance probe (5 legs)
3. SH200A stage with UV Quartz focusing lens
4. Calibration set (Si wafer/ black pad and Al mirror)
5. 200 nm oxide test wafer
6. TFCompanion -RA software
7. Power adapters and USB cables

SH200A stage with transmittance (-TO) accessory installed instead of the reflectance configuration
